

Simple Solutions and Simple Solutions Star Center

What is Simple Solutions?

Simple Solutions workbooks are designed and used to ensure long-term retention of skills, identify gaps in learning, and build valuable background knowledge. Your child may have a Simple Solutions workbook for Reading, Math, Language Arts, Social Studies, Science, etc. depending upon his/her grade level.

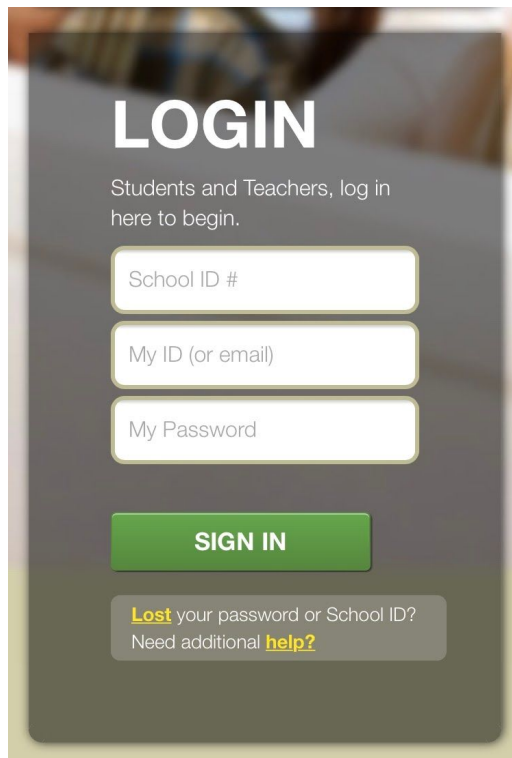

What is Simple Solutions Star Center?

Simple Solutions Star Center is a website students can login to in order to complete Simple Solutions Quizzes digitally. As soon as a student completes a quiz, it will provide them with immediate feedback and tell them their score and the question(s) they answered incorrectly.

How to Access Simple Solutions Star Center

1. Go to <https://digital.simplesolutions.org/> (or just type in Simple Solutions Star Center into your browser).

2. On the right hand side of the screen there is some login information that needs to be entered. Our School ID# is 4665. Your child's teacher will provide you with the My ID (or email) information. Your child's teacher will also provide you with the My Password information. This information will be the same each time they login, so it may be helpful to save the information or write it down on a sheet of paper.
3. Click on the green "SIGN IN" button underneath the login information.
4. On the next screen, locate the quiz your child's teacher has assigned for them to complete, and click on the "START QUIZ" button.
5. Once a quiz has been completed and submitted, your child's score will appear on the screen. Your child can then look and see which question(s) they answered incorrectly.
